Residential	0	2.88	0	5.70	0
<b>Subtotals</b>		0	0		<b>0</b>

**Total Estimated Waste Disposal at 100% Build-out, Tons per Year    19,208**

#### Notes:

Project solid waste generation was developed based on Table 20-1 Projected Solid Waste Generation in the Three Rivers DRI for Nassau County, FL.

Per 2010 (most recent available) US Census Bureau State and County QuickFacts; the Camden County "Persons per household, 20100" is 2.69.

Waste rates are based on calendar days; assuming five day trash collection per week,  $11,726 / 260 = 45$  tons per weekday.

Per 6-12-2015 conversation with Lannie Brant, Solid Waste Director of Operations for Camden County, the increased waste transportation and disposal should not be a problem for the County owned and operated landfill. County waste is trucked to and disposed at the Camden County landfill on SR 110. Camden County accepts 3,000 to 4,000 tons of trash per day and could, by some estimates, have several decades of capacity remaining.
